

OUR VISION
To maximise the health and wellbeing of the UK working population

OUR MISSION
Providing professional leadership and expertise on all strategic health and work issues for stakeholders, including government,, employers, trade unions, education and health professionals

OUR STRATEGY					
We work with partners and other likeminded responsible organisations.					
To provide employers/ employees with tools to manage health	To provide signposting for other health professionals on how to obtain competent advice and support on work and health issues for people under their "care"	To develop and promote consistent professional standards and develop common educational initiatives	To respond to consultations collectively and make the opportunity available to members to respond individually	To identify research needs in the field of health and work and proactively contribute to research and data collection	To develop the Council into a dynamic, robust and viable group working to a common purpose
